ABOUT BRI

Bri Neller-moe is an independent author who recently released her debut romantasy novel, *Secrets in Embers*. Having loved fantasy, romance, and ghost stories all her life, Bri decided she'd take the plunge and turn those ideas in her notes app into stories on the page.

While writing across multiple genres started as a hobby, it sprouted into something more. When she isn't writing, Bri works as a nurse while prioritizing being with her family, their two dogs, two cats, leopard gecko, and fish.

Her hope is for others to love her stories and characters just as much as she did while writing them.

THE STORY

Eve Calloway has spent her entire life living with the secret of being a witch. What's worse is that she's been plagued by nightmares for as long as she can remember. As she's grown, they've become more vivid, more lucid, more tangible than ever before. When new neighbors move in at the same time attacks begin to occur, threatening the safety of their home, it leaves Eve questioning if they truly are just nightmares. Or if the inferno she sees is a warning of what's to come.
